

5. Sweep woodchips off path.

6. Sweep sand off path.

4. Construct 920m new asphalt shared path (2.5m wide) following the existing maintenance track.

Foreshore Road

Sir Joseph Banks Park

Botany Road

Existing shared path

Botany Road

Wilson Street

Existing shared path

7. Sweep debris off path.

3. Install trail directional markers every 300 - 400 metres, and at each path junction or changes of direction. (Approximately 32 required).

8. Rebuild 120m shared path (2.5m wide) between path junction and boardwalk.

2. Widen/reconstruct 240m existing shared path from 2.1m to 2.5m.

Part of Botany constructing shared path and viewing platforms at various locations along foreshore. Grade-separated bridge across Foreshore Road to Sir Joseph Banks Park also to be constructed.

9. Remove bollards from alongside path (not part of main trail route).

1. Develop trailhead facilities in Sir Joseph Banks Park (bike parking; trailhead sign/map).

10. Widen/reconstruct 215m existing path from 1.7m to 2.5m.

Existing car park

13. Paint centre lines on all sections of proposed trail route.

11. Renovate existing viewing platform (paint timber; install interpretive panels; install bike parking racks; install map panel for trail system).

Existing lookout platform

12. Rebuild 100m existing shared path (2.5m wide).
